NAME
>   apvlv — PDF/DJVU/EPUB/HTML/TXT viewer with vim-like behaviour

SYNOPSIS
>   **apvlv** [options] [file]

DESCRIPTION
>   apvlv is a PDF/DJVU/EPUB/HTML/TXT viewer, which behaves like vim.

OPTIONS
>   `-c file`
>   Load configuration from `file` instead of the default ˜/.apvlvrc
>
>   `-h`
>   Show help message and exit
>
>   `-v`
>   Show version and exit

COMMANDS
>   The following command keys can be used inside apvlv. Some of them may be prefixed by a number (as in pressing "13G"), this is indicated by a *count* in their description. Unless noted otherwise, the default value for the number is 1.
>
>   o   Display file chooser to open a PDF/DJVU/EPUB/HTML/TXT file
>
>   O   Select a directory to display
>
>   t   Display file chooser to open a PDF/DJVU/EPUB/HTML/TXT file in a new tab
>
>   T   Select a directory to display in a new tab
>
>   R   Reload the current file
>
>   r   Rotate the document clockwise by 90 degrees
>
>   G   Show page number *count*
>
>   gt   Show next tab
>
>   gT   Show previous tab
>
>   PageDown, C-f
>   Go forward *count* pages
>
>   PageUp, C-b
>   Go backward *count* pages
>
>   C-d   Go forward *count* half pages
>
>   C-u   Go backward *count* half pages
>
>   H   Scroll to page head
>
>   M   Scroll to page middle
>
>   L   Scroll to page bottom
>
>   s   skip some pages *count*
