

The verbose-*ibid* style

This citation style is a slightly more compact variant of the `verbose` style. Immediately repeated citations are replaced by the abbreviation ‘*ibidem*’ unless the citation is the first one on the current page or double page spread (depending on the setting of the `pagetracker` package option). This style is also intended for citations given in footnotes.

Additional package options

The `ibidpage` option

The scholarly abbreviation *ibidem* is sometimes taken to mean both ‘same author + same title’ and ‘same author + same title + same page’ in traditional citation schemes. By default, this is not the case with this style because it may lead to ambiguous citations. If you prefer the wider interpretation of *ibidem*, set the package option `ibidpage=true` or simply `ibidpage` in the preamble. The default setting is `ibidpage=false`.

The `citepages` option

Use this option to fine-tune the formatting of the `pages` and `pagetotal` fields in verbose citations. When an entry with a `pages` field is cited for the first time and the `postnote` is a page number or a page range, the citation will end with two page specifications:

Author. “Title.” In: *Book*, pp. 100–150, p. 125.

In this example, “125” is the `postnote` and “100–150” is the `pages` field (there are similar issues with the `pagetotal` field). This may be confusing to the reader. The `citepages` option controls how to deal with these fields in this case. The option works as follows, given these citations as an example:

```
\cite{key}
\cite[a note]{key}
\cite[125]{key}
```

`citepages=permit` allows duplicates, i.e., the style will print both the `pages`/`pagetotal` and the `postnote`. This is the default setting:

Author. “Title.” In: *Book*, pp. 100–150.

Author. “Title.” In: *Book*, pp. 100–150, a note.

Author. “Title.” In: *Book*, pp. 100–150, p. 125.

`citepages=suppress` unconditionally suppresses the `pages`/`pagetotal` fields in citations, regardless of the `postnote`:

Author. “Title.” In: *Book*.

Author. “Title.” In: *Book*, a note.

Author. “Title.” In: *Book*, p. 125.

`citepages=omit` suppresses the `pages/pagetotal` in the third case only. They are still printed if there is no `postnote` or if the `postnote` is not a number or range:

Author. “Title.” In: *Book*, pp. 100–150.
Author. “Title.” In: *Book*, pp. 100–150, a note.
Author. “Title.” In: *Book*, p. 125.

`citepages=separate` separates the `pages/pagetotal` from the `postnote` in the third case:

Author. “Title.” In: *Book*, pp. 100–150.
Author. “Title.” In: *Book*, pp. 100–150, a note.
Author. “Title.” In: *Book*, pp. 100–150, esp. p. 125.

The string “especially” in the third case is the bibliography string `thiscite`, which may be redefined.

The dashed option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option `dashed`. Setting `dashed=false` in the preamble will disable this feature. The default setting is `dashed=true`.

Hints

If you want terms such as *ibidem* to be printed in italics, redefine `\mkibid` as follows:

```
\renewcommand*{\mkibid}{\emph{}}
```
