

The **nature** bibliography style for **biblatex**^{*}

Joseph Wright[†]

Released 2016/10/26

This package provides a style for **biblatex** which follows the guidelines of the journal *Nature*. The citation style is numeric and unsorted. The bibliography style follows the pattern of the layout used in the journal. The style should be loaded in the usual way

```
\usepackage[style=nature]{biblatex}
```

The References section of this document demonstrates the format generated by the package using the **biblatex-nature.bib** database of example citations.

articletitle Article titles are not always included in the bibliography: for example, standard articles in *Nature* use these but *Letters to the Editor* do not. To control this behaviour, the boolean option **articletitle** is provided; this is set **true** as standard.

intitl The boolean option **intitle** determines whether the title of books is printed for **inbook** and **incollection** entries. It is set **false** as standard.

Suggestions for improvement and bug reports can be logged in the package issue database, found at <https://github.com/josephwright/biblatex-nature/issues>, or can be sent by e-mail to joseph.wright@morningstar2.co.uk.

Change History

v1.0	v1.2d
General: First stable release 3	General: Minor adjustment to URL
v1.0a	formatting to allow for OT1
General: Use new <code>maxbibnames</code>	encoding 3
option in <code>biblatex</code> v1.1 3	
v1.1	v1.2e
General: Heavily revise style	General: Include article title for
internals to aid long-term	<code>inproceedings</code> entries when
maintenance 3	the <code>articletitle</code> option is
Print location for all cases where	true 3
relevant 3	
v1.1a	v1.2f
General: Change log updates 3	General: Track <code>biblatex</code> changes . . . 3
v1.2	v1.2g
General: New <code>articletitle</code> option 3	General: Ensure style works with
v1.2a	both backends 3
General: Fix issue with <code>inbook</code>	v1.2h
entries which lack distinct	General: Work properly with
<code>author</code> and <code>bookauthor</code> 3	<code>urldate</code> option 3
v1.2b	v1.3
General: Remove some extraneous	General: New <code>intitle</code> option 3
warnings 3	
v1.2c	v1.3a
General: Include related data 3	General: Correct <code>intitle</code> default
	value 3
